ABOUT ME

I am a passionate person and always eager to learn about technology and innovation. Adapting and overcoming is my motto that keeps me motivated and confident to overcome hardships. I'm an organized and dependable candidate, successful at managing multiple tasks with positive attitude.

OBJECTIVES

I am a Software Engineering graduate specializing in Web Development, with expertise in HTML, CSS, Javascript & React.js, UI/UX design, and Restful API integration. I am eager to secure an internship or job in this field to improve my skills in the back end while applying my front-end knowledge to create user-friendly and efficient web-based applications. Effective team collaboration and problem-solving complement my technical capabilities.

SKILLS

HTML || CSS || JavaScript || React.js || Bootstrap || WordPress || Flutter

Field of study: Science
Final grade: A

WORK EXPERIENCE

- **Cab Service App - Final Year Project**

  The **"Buraq Cab Service App"** is an Android application similar to Careem and Uber, connecting passengers and drivers via GPS. Any vehicle owner can register on the app, allowing passengers to order various vehicles using their smartphones. The main objective is for drivers to register their vehicles online with essential information and find nearby pick-up and drop-off points.

  - **Frontend Developer [Wise 360 Soft]**
  - **Flutter App Development [Codematics]**
